

OUNA

COSMETICS

Professional Skin Health, Built Around Results.

EXCLUSIVE GCC PARTNER — RENOPHASE, PARIS
FOR PROFESSIONAL USE — CLINICS & PRACTITIONERS

THE OUNA APPROACH — 01

Skin Health Is More Than a Treatment.

OUNA Cosmetics brings together professional-grade skincare, clinical protocols, in-clinic technology and structured home care — connecting what happens in the treatment room to what happens after the patient leaves it.

01

PROFESSIONAL TREATMENT

Targeted clinical and aesthetic intervention, chosen for the concern in front of you.

02

TECHNOLOGY

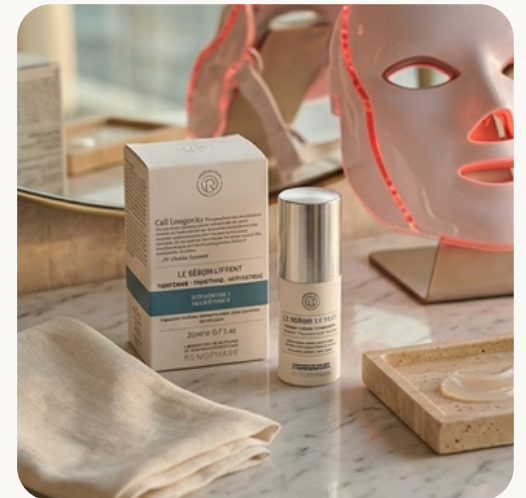

The right device or energy-based technology to complement and extend the treatment strategy.

03

HOME CARE

Consistent, protocol-matched support between appointments, so results don't reset before the next visit.

Together, these create a complete skin-health protocol.

From Products to Protocols.

OUNA does not simply supply product. We work alongside professionals to help them understand:

- Which products work together, and which protocols suit each concern
- How treatment, technology and home care connect into one journey
- How to build that journey with your clinic — not just supply it

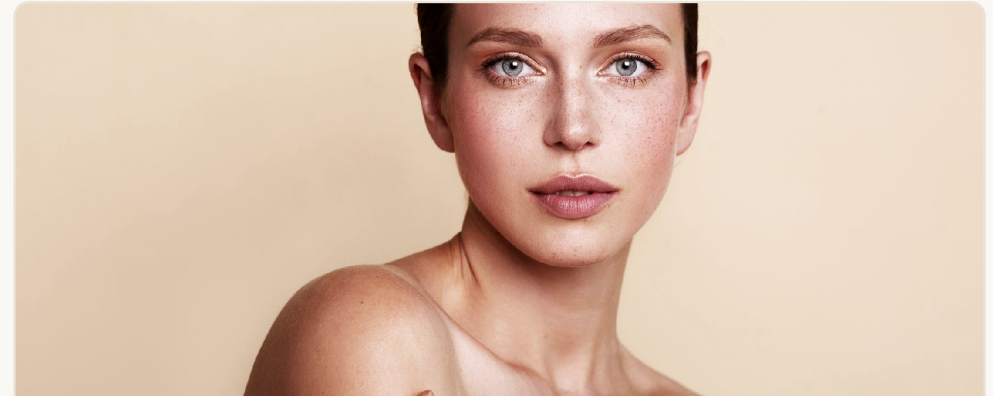

“

We believe the future of professional skincare is not about choosing one product. It is about building the right protocol.

— OUNA COSMETICS

The Brand Behind the Protocols

OUNA Cosmetics curates a portfolio of professional skincare brands, selected for scientific depth, protocol coherence, and results our partners can stand behind. At launch, our portfolio is built around one brand.

FEATURED BRAND

RENOPHASE

French professional skincare from Bordeaux, built on advanced skin biology and Booster Integrative® Dermatology — professional protocols paired with targeted, protocol-matched home care.

40 YEARS OF R&D · INTERNATIONAL PATENTS · EXCLUSIVE GCC DISTRIBUTION VIA OUNA COSMETICS TRADING LLC

RENOPHASE

"Pioneers of Booster Integrative® Dermatology and Oxidative Regenerative Medicine, for precision Cell Longevity."

RENOPHASE is built on the science of cellular longevity — protecting and maintaining cellular health, and supporting the skin's appearance over the long term, by combining biological precursors with non-invasive and hybrid laser technologies.

Rather than working in isolation, RENOPHASE's Integrative® technology is designed to respond to energy — activating alongside laser, IPL, RF, HIFU and LED protocols.

INTEGRATIVE® CELL LONGEVITY

One Skin. Three Layers of Support.

STAGE 01 In Clinic

Professional treatment, chosen for the concern in front of you.

STAGE 02 Enhanced

Technology or device, matched to extend the treatment strategy.

STAGE 03 At Home

Daily home care that carries the result forward between visits.

STAGE 04 Long-Term

Skin health and maintenance, built session over session.

OUNA helps professionals connect these stages into one consistent journey — so results build on each other, instead of resetting between visits.

40Y

YEARS OF R&D

FRENCH FORMULATION

GCC

EXCLUSIVE PARTNER

Proven, Documented Results.

Real before-and-after documentation from RENOPHASE Booster Integrative® protocols — spanning pigmentation, firmness, rosacea and acne-prone skin.

Individual results vary by skin type, concern and adherence to protocol. Images show clinical documentation of RENOPHASE professional protocols; cosmetic results, not medical outcomes.

DEVICES

LED — Red 630nm

Each protocol follows the RENOPHASE Booster Integrative® structure — Prepeel, numbered in-clinic steps, optional technology, and a matched cosmeceutical home-care routine. Full step-by-step protocol sheets are available to trained partner clinics.

Built for Professionals.

A partnership with OUNA is built around the clinic, not just the order form. Depending on your practice, it can include:

01

Professional Product Access

Direct access to the full RENOPHASE professional range, at professional pricing.

02

Treatment Protocols

Structured protocols built around specific skin concerns, not single SKUs.

03

Product Education

Clear guidance on what each product does, and why it belongs in a given protocol.

04

Team Training

Hands-on training for the clinicians and therapists delivering the protocol.

05

Protocol Development

Support building or refining a protocol around your clinic's own specialties.

06

Home-Care Recommendations

A matched take-home routine for every in-clinic treatment you offer.

07

Commercial Packages

Collaboration packages designed for a confident start and sustained results.

08

Ongoing Support

A continued point of contact as your protocol — and your practice — evolves.

All Products at a Glance.

Every RENOPHASE product carried by OUNA — retail and professional. Full pricing available on request.
